Notes

This information is intended to assist a unitholder of Brookfield Infrastructure Partners L.P. in the calculation of the adjusted cost base of their units. The adjusted cost base is used in calculating the capital gain or loss, assuming the units are capital property of the holder, on any disposition.

Each unitholder's adjusted cost base is calculated based upon the amount paid for their units and the period through which the units were held. Unitholders should consult their own tax advisors with respect to the calculation of the adjusted cost base of their units.

A holder of units is required to reduce the adjusted cost base of their units by an amount equal to the cumulative distributions received plus/(minus) any cumulative income/(loss) and other amounts allocated on their T5013. Taxable income is allocated to unitholders based upon distributions. The computation of adjusted cost base must be done in Canadian dollars.

The table above reflects the adjusted cost base to a holder of one original unit acquired through the January 2021 preferred issuance and owned continuously up to December 31, 2024.

** Return of capital percentage is computed by including only the taxable portion of capital gains or allowable portion of capital losses.*
